
Longitudinal vertical sections showing specific conductance (µS/cm), dissolved oxygen (µM), and boron (µM) in ground water along transect A-A' in 1996 (0.5 yrs), 1998 (2.5 yrs), 2000 (4.5 yrs), 2002 (6.5 yrs), and 2004 (8.5 yrs post-cessation). Dots show positions of well screens and multilevel sampler ports (Modified from figure 3 in Repert and others, 2006).
